Experience

Uphead Management Consulting Product Implementation Trainee

Feb 2026 - May 2026

- Designed and developed dynamic React administrative dashboards for financial payouts and event revenue, integrating dynamic API parameters with complex UI state mapping.
- Developed and maintained dynamic user interfaces for live client projects using React.js , ensuring high performance and responsiveness.
- Styled responsive web components using modern CSS and Tailwind CSS, improving overall cross-browser compatibility.
- Conducted rigorous QA testing across multiple project phases, identifying and resolving bugs to ensure seamless product delivery.
- Managed direct client communications, gathering requirements and translating business needs into actionable technical tasks.
- Collaborated with the development team to deliver scalable MERN stack solutions within strict project deadlines.
- Led platform-wide responsive UI refactoring and resolved critical layout, filtering, and API data-mapping.
- Contributed to **15+ pull request** merges while working on multiple live production projects during the internship.

Projects

• My portfolio Website | Technology use : (MERN Stack). Live Demo: rajdip-portfolio-alpha.vercel.app
